EDUCATION

University - KTH Royal Institute of Technology **Stockholm**
BSc in Computer Science – GPA 4.41/5.00 First Class Honors

Upper High School - Östra gymnasiet **Stockholm**
Score 21.98/22.50 – Diploma received

High School - Edboskolan **Stockholm**
Score 337.5/340 – School Valedictorian

WORK EXPERIENCE

2024-26 Senior Full Stack Engineer – Stabelo (Full-time)
Developed end-to-end mortgage application flows spanning customer onboarding, loan approval, and payout, with integrated risk assessment, KYC, and AML compliance. Incorporated regulatory updates such as the Swedish government's 2026 loan-to-value cap increase to 90%. Designed automated accounting systems for financial event processing and built pipelines to ingest monthly Swedbank reports from email, extracting key metrics for internal tracking.

Tech: React, NestJs, Typescript, Vitest, Postgres, Microservice Architecture, Docker, AWS, Apple Business Manager, Intune, OpenAPI, Git.

2023-24 Full Stack Engineer – Stryda (Full-time)
Launched full-stack statistics pages for League of Legends and Valorant, building both frontend and backend layers. Developed Java WebFlux gateways to aggregate data from multiple backend microservices and serve it to frontend clients. Built a desktop screen-recording app for games that downsampled footage and forwarded it to an AI backend, where image recognition models detected in-game highlights, enabling automated, polished highlight reels with music and transitions showcasing the user's most epic moments.

Tech: React, React Query, Tailwind, Styled Components, Cypress, Jest, Docker, Java Spring Boot, Mockito, Postgres, WebFlux, Rust, Python, Supervisely ML Image Recognition, Kafka, Rabbit MQ, Firestore, GCP, Typescript, Microservice Architecture

2022-23 Full Stack Engineer – Stryda (Consultant)
Launched a ChatFeed supporting 50,000+ simultaneous users from the ground up, with a strong focus on cost-efficient scalability. Architected solutions involving load balancing, horizontal and auto-scaling, inter-instance messaging layers for WebSocket technology, and smart caching strategies to minimize database read costs.

Tech: WebSockets, React, NestJs, Redis, Firestore, Typescript, Storybook, Tailwind, Docker, Kafka, JIRA, React Testing Library, Micro Frontends, Microservice Architecture

KRISTOPHER WERLINDER

2022-22 Full Stack Engineer – Happy Habits (Consultant)
Built a production iOS app from the ground up, implementing Firebase Analytics to track user interactions across events, content, and pages. Developed an onboarding flow with interactive CBT statistical dashboards, and delivered rich native features including 60fps breathing technique animations, native audio/video media players, and mp3/video components in React Native. Deployed iOS and Android push notification services.

Hardened the backend with a comprehensive security stack: JWT authentication via Passport.js, input sanitization and validation with express-validator to prevent XSS, HTTPS enforcement through Helmet to mitigate man-in-the-middle attacks, CORS restricted to trusted domains, IP-based rate limiting against DDoS, and parameterized queries via Sequelize ORM to prevent SQL injection.

Tech: Typescript, React Native, Node, Express, Jest, Passport JWT, Styled-Components, Trello, Figma, Git Hooks, TestFlight.

2021-22 Full Stack Engineer + Cloud + Data Analysis – Ericsson
Deployed pipelines with Github and GCP tools such as Cloud Build, Push Triggers, App Engine. Cost optimizing low traffic applications with Cloud Run. Setting up event-driven notifications with Pub/Sub. Worked with revenue and capital forecasting analysis with Python, XGBoost, RandomForest, and Jupyter Notebook in the Financial AI Analytics team. Built a data visualization tool.

Tech: GCP, Flask, Python, Docker, Nginx, React, DBSCAN, Random Forest, Isolation Forest.

2020-21 Full Stack Engineer – CurbFood
Responsible for the Kitchen Order & Delivery Systems - frontend, backend, iOS Deployment & Operations, UberEats/Foodora/Wolt API integrations, Automated Testing with Jest, data validation with Joi. Owned responsibility for the solution's iOS release flow. Handled communication and tech integration with kitchen staff. Played a crucial role in enabling the €20M Series A funding from Point72 Ventures.

Tech: Typescript, GraphQL, Apollo, NodeJS, React Native, Firestore, GCP, Jest, TestFlight.

2020-20 Software Engineer – Open Payments Europe
Developed a complete full stack website to help demonstrate the different use cases of Open Payments Europe's fin-tech product to customers. Setup a SSL certificate and enforced secure cookies to prevent man-in-the-middle attacks.

Tech: MongoDB, Express, React, Node (MERN), API design, sessions, data security, scalability, error handling, UX.

2019-20 Software Developer – Frilans Finans
Deployed front-end solutions for local clients
Tech: React, React Context, Styled Components, SASS, Node, Express, Heroku, Netlify.

Skills and Qualities

- Fast learner, goal oriented, team player, outgoing personality
- Typescript, React, Node, Next, Nest, Cypress, Jest, GraphQL, GCP, AWS, Docker, Rust
- Invented a new chess game that has been well received on LinkedIn (2021)
- Released a programming project that has been view over 2M+ times (2020)
- Accepted into Mensa - a non-profit association founded in Oxford (2019)
- Reached a 1500 ELO in Chess 97th percentile – member of chess club (2018)

KRISTOPHER WERLINDER

- Ranked 48th among 78.000.000+ players internationally in League of Legends (2017)
- Placed 66th in National Chemistry Olympiad – prestigious chemist competition (2017)
- Pianist – Favorite composer Hans Zimmer
